

New Weather Bureau Publications

Current Federal Meteorological Research and Development Activities, Fiscal Year 1964 (U.S. Weather Bureau Portion Only). Washington, D.C., 1964, 97 pp. Price 60 cents.

The second annual catalog-type compilation of information on meteorological research and development activities being sponsored by the Federal government.

The Climate of Texas and the Adjacent Gulf Waters, Robert B. Orton, Washington, D.C., 1964, 195 pp. Price \$1.00.

Presents meteorological information necessary for the testing of certain spacecraft apparatus and for the selection of possible spacecraft landing sites. Special emphasis is placed on sky cover, ceiling height, visibility, and wind, and on the local physiography and the synoptic weather systems that influence the area.

These publications are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C., 20402.
